Report of the state of Astronomical Calculations, on 18

No. of Book.	Subject of Book.	Line of Computation.	Date at Completion of Entry or Computation.	Date at Completion of Examination.
1	Transits.	Transits on separate Wires		
		Means of Wires		
		Corrections for omitted Wires *entered*		
		Observed Transit		
		Factors of Errors		
		Error of Collimation and Level Error *entered.*		
		Product for 1st and 2nd Error		
		Application of 1st and 2nd Error		
		Azimuthal Error *entered*		
		Product for Azimuthal Error		
		True Transit		
		Clock Error and Rate *entered*		
		Proportional part of Rate		
		True Apparent Right Ascension		
		Semidiameter *entered*		
		Right Ascension of Center		
		Stars' corrections *entered*		
		Mean Right Ascension		
		Last discussion of Personal Equation		
		Personal Equation applied		
		Computation for defective limb of Moon		
2	Completion of Transits.	Last investigation of Intervals of Wires		
		Application to Stars and Planets		
		Application to Polaris, λ, and δ Ursæ Minoris		
3	Collimation of Transit.	Last investigation of value of Micrometer Scale		
		Date of last observations for Collimation		
4	Levelling of Transit.	Last investigation of value of Scale Divisions		
		Date of last observations for Level		
5	Azimuthal Error.	Azimuthal Error computed		
6	R. A. of Nautical Almanac Stars.	Corrections to Jan. 1		
		Corrected R. A. for day		
7	R. A. of Polaris and δ Ursæ Minoris.	Corrections to Jan. 1		
		Corrected R. A. for day		
8	Clock Errors.	Apparent R. A. *entered*		
		True Transit *entered*		
		Apparent Error and Mean Error		
		Clock's Loss in 24 hours		
		Rate adopted		
		Clock's Error at 0ʰ Sidereal		

Report of the state of Astronomical Calculations on 18

(*continued.*)

No. of Book.	Subject of Book.	Line of Computation.	Date at Completion of Entry or Computation.	Date at Completion of Examination.
9	Corrections of Small Stars in R. A.	No. in B. A. C., or R. A. and N. P. D. *entered*		
		Log. A, B, C, D, *entered*		
		Logarithms for Stars *entered*		
		Sums of Logarithms		
		Natural numbers		
		Sums of numbers		
10	Mean Time.	Sidereal Time for meridional results *entered*		
		Mean Solar Time		
		Sidereal Time for Obs. with Alt. and Azim. Instr. *entered.*		
		Mean Solar Time		
		Sidereal Time for other extrameridional Obs. *entered.*		
		Mean Solar Time		
'11	Adjustments of Transit.	Last examination of Transit Pivots		
		Last observations or remarks		
12	Ledger of Stars' R. A.	Separate determinations of R. A.		
		Means taken		
14	Transit Copy for Press.	Left page written		
		Right page		
		Notes		
15	Approximate Clock Errors.	Last determination from Transits.		
		Clock Errors prepared		
		Comparisons of Clocks reduced		
16	Circle Observations.	Readings of separate Microscopes		
		Corrections for Runs for 5′ *entered*		
		Proportional part of Corrections for Runs		
		Corrected mean of Microscopes		
		Micrometer corrections *entered*		
		Application of micrometer correction		
		Change of N. P. D. and Cor. for Curvature *entered*		
		Application of change of N. P. D. and Cor. for Curvature		
		Concluded Circle Reading		
		Zenith Point *entered*		
		Apparent Zenith Distance		
		Refractions *transferred*		
		True Zenith Distance.		
		Geocentric Zenith Distance		
		N. P. D. of Limb		
		N. P. D. of Center		
		Star Corrections *entered*		
		Mean N. P. D.		

Report of the state of Astronomical Calculations, on 18

(*continued.*)

No. of Book.	Subject of Book.	Line of Computation.	Date at Completion of Entry or Computation.	Date at Completion of Examination.
16 (*cont^{d}.*)	Circle Observations (*continued.*)	Refraction numbers for Barometer and Thermometer .		
		Refraction numbers for Zenith Distance . . .		
		Sums		
		Natural numbers		
		Application of correction for Defective Limb of Moon .		
		Observed Diameters of Sun, Moon, and Planets . .		
17	Small Corrections for Circle Observations.	Last investigation of value of Micrometer Scale . .		
		Micrometer Computation		
		Change of N. P. D. for Planets		
		Change of N. P. D. for Moon		
		Computation of Parallax for Planets		
		Correction for Defective Limb of Moon . . .		
20	Adjustments of Circle.	Observations for Runs		
		Transits for Circle Position reduced		
		Last entry of other matters		
23	Zenith Points.	Concluded Circle Readings *entered*		
		Groups separated		
		Circle Readings combined		
		Zenith Points adopted		
		Last observation with Reflecting Eyepiece . . .		
		Zenith Points adopted		
24	Moon's Parallax.	Zenith Distance *entered*		
		Equatoreal Parallax *entered*		
		Parallax computed		
25	N. P. D. of Nautical Almanac Stars.	N. P. D. and Corrections to Jan. 1		
26	Corrections of Small Stars in N. P. D.	Number in B. A. C., or R. A., and N. P. D. *entered* .		
		Log. A, B, C, D, *entered*		
		Logs. for Stars *entered*		
		Sums of Logarithms		
		Natural numbers		
		Sums of natural numbers		
27	Copy of Circle Observations for Press.	Copy written { Left Page / Right Page		
		Notes		
29	Ledger of Stars' N. P. D.	Separate Determinations of N. P. D.		
		Means taken		

Report of the state of Astronomical Calculations, on 18

(*continued.*)

No. of Book.	Subject of Book.	Line of Computation.	Date at Completion of Entry or Computation.	Date at Completion of Examination.
30	Interpolations.	Times and subjects for Merid. Obs. *entered*		
		Numbers from N. A. *entered*		
		Interpolation completed		
		Times and subjects for Alt. and Az. Obs. *entered*		
		Numbers from N. A. *entered*		
		Interpolation completed		
		Times and subjects for Equatoreal Obs. *entered*		
		Numbers from N. A. *entered*		
		Interpolation completed		
		Times and subjects for Occultations *entered*		
		Numbers from N. A. *entered*		
		Interpolation completed		
13	Deductions from Meridional Observations.	Investigation of R—D		
		Investigation of Correction of Latitude		
		Star Catalogue		
		Comparison of Observed and Tabular Diameters of Sun, Moon, and Planets		
		Comparison of Observed and Tabular R. A.		
		Comparison of Observed and Tabular N. P. D.		
		Investigation of Position of Ecliptic		
		Errors of Sun and Planets in Long. and E. P. D.		
		Heliocentric Errors of Planets		
		Errors of Moon in Long. and E. P. D.		
60	Zenith Tube.	Last investigation of values of Micrometer Divisions		
		Reduction of Upper Microscope		
		Reduction of Lower Microscope		
		Reduction of Grand Micrometer		
		Result for Zenith Distance		
68	Zenith Distances observed with the Altitude and Azimuth Instrument.	Transits on Separate Horizontal Wires		
		Means of Wires		
		Last examination of Intervals of Wires		
		Correction for Omitted Wires *entered*		
		Clock Time of Vertical Transit		
		Clock Error and Rate *entered*		
		Sidereal Time of Vertical Transit		
		Readings of separate Microscopes of Vertical Circle		
		Last Examination of Runs		
		Correction of Runs for 5′ *entered*		
		Concluded Reading of Vertical Circle		
		Reading Corrected for Level		
		Refractions *transferred*		
		Circle Readings corrected for Refraction		

Report of the state of Astronomical Calculations, on 18

(*continued.*)

68 (*cont^{d}.*)	Zenith Distances Observed with the Altitude and Azimuth Instrument— (*continued.*)	Zenith Point *entered*		
		True Observed Zenith Distance		
		Approximate Zenith Distance		
		Refraction numbers for Barometer and Thermometer .		
		Refraction numbers for Zenith Distance . . .		
		Sums		
		Natural numbers . , ...		
69	Azimuths observed with the Altitude and Azimuth Instrument.	Transits on separate Vertical Wires		
		Means of Wires		
		Last examination of intervals of Wires		
		Corrections for Omitted Wires *entered*		
		Clock Time of Horizontal Transit		
		Clock Error and Rate *entered*		
		Sidereal Time of Horizontal Transit		
		Readings of separate Microscopes of Horizontal Circle .		
		Last Examination of Runs		
		Correction of Runs for 5′ *entered*		
		Concluded Reading of Horizontal Circle . . .		
		Correction for form of Pivots *entered*		
		Factors for Collimation and Level *entered* . . .		
		Errors of Collimation and Level *entered* . . .		
		Reading of Horizontal Circle corrected . . .		
		Zero of Azimuth *entered*		
		Observed Azimuth		
		Level Indication for Horizontal Axis		
70	Comparisons of New South Dome Clock with Transit Clock.	Times by Clocks and Chronometers *entered* . . .		
		Correction from Solar to Sidereal Time *entered*. . .		
		Chronometer's Losing Rate *entered*		
		Interval in Sidereal Time		
		Transit Clock slow at 0^{h} Sidereal and Rate *entered*. .		
		Sidereal Time at comparison with Transit Clock . .		
		Error of New South Dome Clock		
71	Corrections for Figure of Earth, Moon's Semi-diameter, and Moon's Parallax, for observations with Altitude and Azimuth Instrument.	Observed Z. D. of Limb *entered*		
		Approx. Tab. Geoc. N. P. D. *entered*		
		Approx. Tab. Normal Centric Z. D. *entered* . .		
		Tab. Hor. Eq. Parallax *entered*		
		Tab. Geoc. Semidiameter *entered*		
		Normal Centric Correction to N. P. D. . . .		
		Semidiameter in Azimuth		
		Normal Centric Semidiameter		
		Normal Centric Parallax		

Report of the state of Astronomical Calculations, on 18

No. of Book.	Subject of Book.	Line of Computation.	Date at Completion of Entry or Computation.	Date at Completion of Examination.
72	Tabular Azimuths and Zenith Distances of Stars and Moon's Limb for observations with Altitude and Azimuth Instrument.	Sidereal Time of Observation Tabular R. A. of Center *entered* Hour Angle Tabular Geoc. N. P. D. of Center *entered* Normal Centric N. P. D. of Center *entered* Normal Centric Correction *entered* Azimuth of Center Azimuthal Semidiameter *entered* Tabular Azimuth of Limb Observed Azimuth *entered* Error of Tabular Azimuth Normal Centric Zenith Distance of Center Normal Centric Semidiameter *entered* Normal Centric Zenith Distance of Limb Normal Centric Parallax *entered* Tabular Greenwich Zenith Distance of Limb Observed Zenith Distance of Limb Error of Tabular Zenith Distance		
73	Zenith Points of the Vertical Circle of Altitude and Azimuth Instrument.	Corrected Circle Readings *entered* Tabular Zenith Distance *entered* Groups formed Zenith Points adopted		
74	Error of Collimation; and Level Reading for Horizontal Position of Horizontal Axis of Alt. and Az. Instr.	Zenith distances, Cosecants, and Cotans. *entered* Level Readings *entered* Concluded Reading of Circle Tabular Azimuth *entered* Results complete		
75	Zero of Azimuth of Horizontal Circle.	Readings of Horizontal Circle *entered* Tabular Azimuths *entered* Groups formed Zero adopted		
76	Adjustments of Alt. and Az. Instr.	Date of last computation or remark		
81	Conversion of Errors of Azim. and Zen. Dist. into Errors of R. A. and N.P.D.	Mean Solar Time, Hour Angle, and N. P. D. *entered* Errors of Azimuth and Zenith Distance *entered.* p, q, r, s, *entered* Error of R. A. and Error of N. P. D. found		
64	Equatoreal Computations in R. A.	Last observations Last examination of Runs for Hour Circle Microscopes		

Report of the state of Astronomical Calculations, on 18

(*continued.*)

No. of Book.	Subject of Book.	Line of Computation.	Date at Completion of Entry or Computation.	Date at Completion of Examination.
64 (*cont^{d}.*)	Equatoreal Computations in R. A.— (*continued.*)	Concluded Reading of Hour Circle in Time . . .		
		Refraction in R. A. *entered*		
		Parallax in R. A. *entered*		
		Instrumental R. A. corrected		
		Assumed R. A. of Star *entered*		
		R. A. of Comet, &c.		
		Interpolated R. A. *entered*		
		Last Transits for Moon's Diameter		
		Error of Moon's Diameter computed		
65	Equatoreal Computations in N.P.D.	Last observations		
		Last examinations of Runs for Dec. Circle Microscopes .		
		Concluded Circle Reading in Arc		
		Last examination of Sector Divs. and Micrometer Divs.		
		Pointer Reading and Micrometer Reading in Arc .		
		Refraction in N. P. D. *entered*		
		Parallax in N. P. D. *entered*		
		Instrumental N. P. D. corrected		
		Assumed N. P. D. of Star *entered*		
		N. P. D. of Comet, &c.		
		Interpolated N. P. D. *entered*		
	Double Image Micrometer.	Last determination of value of divisions . . .		
		Last determination of Polar Point		
		Last observation		
		Reductions made to		
	Eclipses and Occultations.	Last observation		
		Time by Transit Clock		
		Sidereal Time		
		Mean Time		
31	Calculation of Occultations.	Times *entered*		
		Numbers from Interpolation Book *entered* . . .		
		Places of Stars *entered*		
		F. and G. computed		
		Approximation made		
		Distance of corresponding Point found . . .		
		Final equation formed		
	Miscellaneous Computations.			

Report of the state of Astronomical Calculations, on 18
