Chromospheric structure and dynamics

From old wisdom to new insights

Sacramento Peak Observatory, Sunspot, NM, USA, August 31st September 4th, 2009

editors: K. Reardon

TABLE OF CONTENTS

<i>Index</i>	533
<i>Foreword</i>	537
<i>List of Participants</i>	539
P. G. Judge <i>The chromosphere: gateway to the corona?... Or the purgatory of solar physics?</i>	543
T. Ayres <i>A Stellar Perspective on Chromospheres</i>	553
R. J. Rutten <i>The quiet chromosphere: Old wisdom, new insights, future needs</i>	565
J. Leenaarts <i>Numerical simulations of the quiet chromosphere</i>	576
M. Carlsson, V. H. Hansteen and B. V. Gudiksen <i>Chromospheric heating and structure as determined from high resolution 3D simulations</i>	582
A. De Wijn, S. W. McIntosh and B. De Pontieu <i>On the propagation of p-modes into the solar chromosphere</i>	588
M. Loukitcheva, S. K. Solanki and S. M. White <i>Observations of the solar chromosphere at millimeter wavelengths</i>	592
F. Wöger, S. Wedemeyer-Böhm, H. Uitenbroek and T. Rimmele <i>Recovering the line-of-sight magnetic field in the chromosphere from Ca II IR spectra</i>	598
F. Kneer <i>Chromosphere of active regions on the Sun</i>	604

L. Fletcher	
<i>The chromosphere during solar flares</i>	616
A. Asensio Ramos and J. Trujillo Bueno	
<i>On the 3D structure of the magnetic field in regions of emerging flux</i>	625
M. L. Goodman and F. Kazeminezhad	
<i>Anisotropic transport processes in the chromosphere and overlying atmosphere</i>	631
H. Hudson, L. Fletcher and S. Krucker	
<i>The white-light continuum in the impulsive phase of a solar flare</i>	637
B. Livingston, O. R. White, L. Wallace and J. Harvey	
<i>Sun-as-a-Star, Chromospheric Lines, 1974-2009</i>	643
A. Berlicki, P. Heinzel and E. H. Avrett	
<i>Photometric analysis of Ellerman bombs</i>	646
G. Haerendel	
<i>Chromospheric evaporation via Alfvén waves</i>	653
P. Heinzel, U. Anzer and S. Gunár	
<i>Solar quiescent prominences: Filamentary structure and energetics</i>	654
S. F. Martin and O. Panasenco	
<i>On dynamical properties of filament channels</i>	662
C. Kuckein, R. Centeno and V. Martínez Pillet	
<i>Spectropolarimetric inversions of the He I 10830 Å multiplet in an active region filament</i>	668
O. Panasenco	
<i>Spicules and prominences: their life together</i>	673
J. Trujillo Bueno	
<i>Spectropolarimetric investigations of the magnetization of the quiet-Sun chromosphere</i>	681
S. Wedemeyer-Böhm	
<i>Small-scale structure and dynamics of the chromospheric magnetic field</i>	693
H. Uitenbroek	
<i>Detection of chromospheric magnetic fields: a forward modeling approach</i>	701
L. Belluzzi and E. Landi Degl'Innocenti	
<i>Magnetic field diagnostics through the second solar spectrum: a spectroscopic analysis of the most polarizing atomic lines</i>	710
J. de la Cruz Rodríguez, H. Socas-Navarro, M. van Noort and L. Rouppe van der Voort	
<i>Observation and analysis of chromospheric magnetic fields</i>	716

W. Abbett and G. H. Fisher <i>Improving large-scale convection-zone-to-corona model</i>	721
V. G. Hansteen, H. Hara, B. de Pontieu and M. Carlsson <i>On red-shifts in the transition region and corona</i>	729
E. Scullion, J. G. Doyle and R. Erdélyi <i>A spectroscopic analysis of macrospicules</i>	737
C. Nutto, O. Steiner and M. Roth <i>Numerical simulations of wave propagation in the solar chromosphere</i>	744
T. Straus, B. Fleck, S. M. Jefferies, M. Carlsson and T. D. Tarbell <i>On the detection of fast moving upflows in the quiet solar photosphere</i>	751
N. Bello González, M. Flores Soriano, F. Kneer and O. Okunev <i>On the energy flux in acoustic waves in the solar atmosphere</i>	757
S. Jaeggli, H. Lin, D. L. Mickey, J. R. Kuhn, S. L. Hegwer, T. R. Rimmele and M. J. Penn <i>FIRS: A new instrument for photospheric and chromospheric studies at the DST</i>	763
F. Bostanci and N. Al Erdoğan <i>Cloud modeling of a quiet solar region in Hα</i>	769
S. Criscuoli, I. Ermolli, J. Fontenla, F. Giorgi, M. Rast, S. K. Solanki, H. Uitenbroek <i>Radiative emission of solar features in Ca II K</i>	773
B. Fleck, Th. Straus, M. Carlsson, S. M. Jefferies, G. Severino and T. D. Tarbell <i>High frequency waves in the solar atmosphere?</i>	777
M. Haberreiter, W. Finsterle, S. McIntosh, S. Wedemeyer-Böhmer <i>Toward the analysis of waves in the solar atmosphere based on NLTE spectral synthesis from 3D MHD simulations</i>	782
R. Kariyappa and L. Damé <i>Long-period intensity oscillations of the quiet solar atmosphere from TRACE 1600 Å continuum observations</i>	786
M. Kubo, B. C. Low and B. W. Lites <i>Granular scale magnetic flux cancellations</i>	790
B. W. Lites <i>Emerging flux as the source of downflows in the chromosphere</i>	792
R. Liu, Y. Xu and H. Wang <i>Evolution of filament barbs</i>	796
E. Malanushenko, H. Jones, M. Turmon and J. Pap <i>Analysis of Ca II 8542 Å scanning spectroscopy for statistical feature recognition</i>	801

- M. Stangalini, F. Berrilli, D. Del Moro, A. Egidi, S. Giordano, P. F. Moretti and B. Viticchié
Coupling photosphere and chromosphere through plasma waves 806
- J. Štěpán and J. Trujillo Bueno
On the sensitivity of the $H\alpha$ scattering polarization to chromospheric magnetism 810
- A. G. Tlatov and A. A. Pevtsov
The latitude of ephemeral regions as an indicator for solar-cycle strength 814
